

Victoria Palace Theatre Case Study

The Problem

The Victoria Theatre has grandstand seating, similar to lecture theatre seating, that requires maintenance teams to safely work at height and reduce scaffold costs in all maintenance and support areas.

Palace Theatre maintenance is essential for providing a safe and healthy working environment for staff, students, and patrons from various departments involved in the inspection, repair, and scheduled maintenance of all the theatre and auditorium facilities.

Effective safety management begins with an organisation ensuring that employees have fit for purpose, work at height safety equipment to use, and have been trained to assemble, inspect and operate correctly.

The Solution

The LOBO System is a versatile work platform product that combines the flexibility and strength of traditional scaffolding with the simplicity and mobility of tower systems.

substantially reduced, as your maintenance and production teams can assemble the system anywhere required.

When combined with the tube, the unique and patented hand-adjustable clamp allows the technician or engineer to create a work platform, of any shape or size, without the need for any tools.

The system is made from modular steel components, which are easy and quick to assemble. It flat packs for transport and yet is incredibly strong.

Therefore, outsourced scaffolding costs can be

Conformities

EU: BS EN1004:2004 BS 1139 parts 3 & 4,

USA: Complies to OSHA CFR 29 1926 450-454 & sub part L & codified under 29 CFR 1910.27(a).

Canada: CSA Z797-09 and 269.2 (M87 and -16)

Australia: AS/NZS 1576.1:2010 and AS/NZS 1576.3:2015 Tower

The Conclusion

The LOBO System comprises of trestle legs that vary in size, and adjustable extensions with fixed side clamps. Steel tubes can then be passed through the clamps, which are hand tightened to form a structure to suit the application. Sway braces, toe boards, wheels, guardrails, outriggers and a lifting beam

can be added to enhance the construction.

The LOBO System can be transported from the site and assembled with ease from a flat pack, into any required configuration, by your maintenance staff. It can be stored in a LOBO Towerstore unit when not in use.

Product Benefits

The LOBO System is scalable, adaptable and adjustable to meet your ongoing and changing requirements. Simply add more components or alter your existing configuration to satisfy the demands of the next task.

The Palace Theatre has protected its initial investment with a product that will meet all your access needs safely!

LOBO is a rigid and stable product, which meets or exceeds current safety regulations.

Guardrails can be fitted in seconds, at any point in the erection process.

LOBO Systems provides fully certified training for safe assembly, inspection and use.
