We are the "Rolls-Royce Outdoor Test Facility located at the Stennis Space Center in Mississippi"

Lobo has proven to deliver on all commitments made throughout the procurement process. Customer support involving delivery, set-up and training were carried out in such a manor that all expectations were exceeded.

In addition we have enjoyed a level of follow-up support once receiving the equipment that could set the standard for customer service. The equipment has proven to be extremely versatile and has permitted safe access to situations, circumstances and configurations that previously we could not achieve with existing hardware. The LOBO System continues to show itself easy to set-up, configure and store with ease.

I would recommend having the certified LOBO safety representative demonstrate and carry out training for all team members that would be identified to utilize the system in order fully appreciate and understand the benefits that can safely be anticipated from LOBO Systems.

All The Best,

B**** L*****
Production Leader
