

Case Study - Arriva Train Care

The Problem:

Arriva must implement a multi-purpose scaffolding work platform system that must be HSE/OSHA compliant and allow Arriva's personnel to work on top of their railway carriages. Traditional scaffolding is too heavy, while aluminium towers do not allow access to the roof area as they cannot span.

The Solution:

LOBO Systems' safe and secure platform product.

The unique and patented clamp allows the system to be assembled without tools of any size or shape.

Maintenance crews can attach a guardrail around the carriage or at any point across the roof from a lower level. The advanced guardrail process ensures a safe system is assembled while personnel are not exposed to the risk of a fall during assembly while using the system for maintenance.

The Benefits:

The unique versatility of the LOBO System brings a safe working procedure to Arriva, which meets not only OSHA requirements but also Arriva's safety policy.

The LOBO System also brings cost reduction, enhanced efficiency & performance as maintenance crews can build their platforms anytime. In addition, the LOBO System creates a safe working environment, which increases productivity and maximizes the return on investment.

Conformities

EU: BS EN1004-1:2020 & EU: BS EN1004-2:2021 (BS 1139)

USA: OSHA CFR 29 1926 450-454 & subpart L & codified under 29 CFR 1910.27(a).

Canada: CSA Z797-18 and 269.2 -M87

Australia: AS/NZS 1576.1:2010 and AS/NZS 1576.3:2015 Tower

ISO 9001 : 2015
CERTIFIED 213858

Cost Benefits

LOBO's electroplated steel structure ensures many years of product life and a system that will not shake or rattle. The modular approach means components fully integrate and can be hand-carried.

Fully constructed systems can also be made mobile by the addition of wheels.

Experience shows that deploying the LOBO system reduces the costs of hiring scaffolding and constructing bespoke fixed access systems. By reducing your reliance on outsourced scaffolding and engineering companies, cost savings will be achieved – easily within 12 months.

With this quantifiable cost reduction comes the added savings associated with reduced downtime and greater productivity from your maintenance department.

LOBO is available 24/7, quick to erect, **and above all, safe.**

Why Choose LOBO?

Safe - Available 24/7 - Re-configurable - No-tools Assembly – Simple to Use - Strong and Durable - Reduces Labour Costs – Scalable.

LOBO Towerstore

The Towerstore offers security on or off-site. It provides a secure yet simple way to store your LOBO components, making managing all the parts much more straightforward.

It is explicitly designed for LOBO's advanced work platform system, so it is fitted with feet for easy pallet truck or forklift manoeuvrability. Also, it can be locked with a padlock for security. The Towerstore can be vertically or horizontally mounted to suit the workshop and transported for rapid deployment, on and off-site.
