

## Case Study - MillerCoors Brewing.

### **The Problem:**

Scaffolding services to this brewery are provided by an outsourcing company, costing the plant management around \$100k + per year. The managers at Miller realize that cost reduction is needed to ensure overall plant efficiency. Safety cannot be compromised at any price.

### **The Solution:**

LOBO Systems' safe and secure platform product. The unique and patented clamp allows the system to be quickly assembled without using tools of any size or shape.

Maintenance engineers can assemble, perform the task and dismantle the LOBO System before traditional scaffolding can be erected. Miller has spent approximately \$6500-00 to perform the maintenance and owns their own LOBO System.

### **The Benefits:**

Miller Brewery managers expect to save significant costs using the innovative LOBO product. They do not have to rely on outsourced scaffolding companies, as maintenance personnel can assemble the LOBO System. The versatility of the LOBO System brings labour cost reduction, enhanced efficiency & performance. The LOBO System creates a safe working environment, which increases productivity and maximizes the return on investment.
